WORK EXPERIENCE

• 02/2017 - 07/2022 - NG Informática

Job Title: Software Developer

Description: My functions were to develop, test, document and homologate the medicine and occupational safety and environmental management modules of an ERP system in ADVPL language. In my position I fixed bugs on the system, I supported clients with remote access, I developed new screens thinking in UX design, always working in contact with agile methods. I worked most part of the time with the integration between the data of the medicine and occupational safety module and the brazilian government system called eSocial.

City: Joinville, Santa Catarina - Brazil

Skills: ADVPL, SQL, Git, Jira
