WORK EXPERIENCE

- **02/2017 - 07/2022 - NG Informática**

  Job Title: Software Developer
  Tasks: Develop, test, document and homologate the medicine and occupational safety and environmental management modules of an ERP system in ADVPL language. My tasks were to fix bugs on the system, support clients with remote access, develop new screens thinking in UI/UX design, always working in contact with agile methods. I worked most part of the time with the integration between the data of the medicine and occupational safety module and the Brazilian government system called eSocial.
  City: Joinville, Santa Catarina - Brazil
  Skills: ADVPL, SQL, Git, Jira

- **12/2023 - Currently - Writech Group**

  Job Title: Developer Engineer
  Tasks: Develop and test frameworks using MS Access and apps using MS PowerApps for the company.
  City: Mullingar, County Westmeath - Ireland
  Skills: MS Access, MS PowerApps, SQL
